Facilities Management Nationwide

Who We Are

We are a truly national support services provider, with full coverage across England, Scotland and Wales. All of our operatives are fully DBS checked and are highly skilled in our industry. We carry out a range of services from specialist maintenance, Commercial Cleaning, training and janitorial/PPE supplies. Our vehicles & machinery are specially modified to match the range of service we provide. We are insured for up to £10 million for both public and employee liability.

We pride ourselves on customer service and quality, every job we carry out goes through our quality control process, followed up by a phone call & E mail after completion of your work to ensure it has been done to the required standard. It is our customer promise, if you are not happy, a member of our team shall be back within 72 hours to rectify. From start to finish, you're our priority.

National & Nationwide Maintenance Services

Decontamination & Infection Control

UK Commercial Group safely & professionally decontaminate places, businesses & areas, covering infections like Coronavirus, bodily spillages & needle sweeps.

- Decontamination cleaning
- Fogging
- Infection Control
- Needle Sweeps
- Bodily Spillages
- H&S and Insurance
- PPE

Deep Cleaning Services

Our Commercial Deep Cleaning Operatives are highly trained and will clean your premises to the highest possible standard! Using proven cleaning methods and high quality commercial machinery to achieve this result. We use Karcher equipment to clean down carpets as well as Karcher scrubber dryers and chemical dispensing rotary buffers so your floors will be restored to the best possible standard. Our operatives will also use Matrix multi use Steamers to clean your equipment and running at 130-150 degrees Celsius they will also sanitise as they go so you can be confident that your equipment will be left in a sanitary condition.

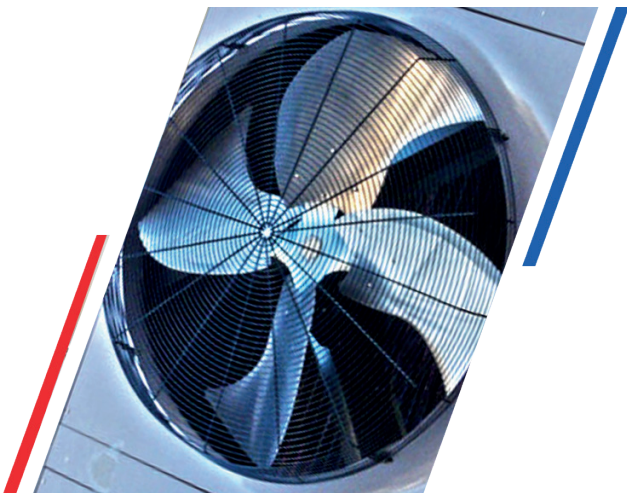

Deep cleans are a fantastic way to give your premises a thorough top to bottom clean and as well as the commercial machinery mentioned we have our own range of bespoke chemicals. These allow us to clean every section of a deep clean with the correct type of chemical as well as leaving a sanitised building with a fresh smell. We understand that every company is different and our tried and tested techniques can be adapted to suit your needs!

Drain & Gutter Cleaning

Having clear Drains & Gutters is of the up most importance especially in commercial buildings! Leaving blocked drains will encourage the growth of harmful bacteria which can cause a health hazard for both your employees and visitors. Using our High pressure jetting equipment we can attend your premises on a pre-planned maintenance visit so that you can be sure your drains are kept clear all year round! Using these 3000psi jetting machines really clears out the drains allowing them to flow freely. If we come across any blockages we can offer a CCTV survey of your drainage system highlighting any repairs and even carry out those repairs if you wish us to.

The team while on site for your pre planned maintenance visit can use various methods including Ladder, towers scaffold, and other leading technology to clear any debris from your gutter system. Cleaning out the gutters of your premises is important as blocked gutters can lead to overflowing water and water ingress to your building. Most commercial insurance policies insist that you have your gutters cleared by a professional company for the policy to be valid, don't get caught out this year!

Extraction System & Fan Repairs

The extraction fan is an important part of your industrial or commercial premises. It helps improve the air quality and reduces the humidity levels in your premises by removing moisture. In fact, high levels of humidity can result in mould growth, which may affect the health of your employees. If your extraction fans are giving you troubles, call UK Commercial Group for reliable extraction fan repairs across the UK.

Commercial Window Cleaning

Window cleaning is an integral part to any business as your windows may be one of the first things a customer sees before entering your premises. That's why at UK Commercial Group, we want to make sure that your windows are perfect first time!

Our skilled operatives use Reach and Wash methods to safely clean your upper floor windows from the ground, as well as being safer this allows us to do the work faster and pass those labour saving costs on to you! Your ground floor windows are then cleaned in the traditional method. By combining these techniques you are left with a spotless finish at a safer a faster rate.

Drainage Repairs

UK Commercial Group provides a full drainage repairs service across the UK. From root removal and drainage refurbishment to complete drainage system re-lining, we do them all.

A faulty drain can often go unnoticed, which can create a lot of trouble. Damaged drains are breeding grounds for rodents; they smell bad, and can even leak into the foundation causing structural damage.

Kitchen & Extraction System Cleaning

Regardless of the business you're in, if you have a commercial kitchen then having a clean kitchen is of the up most importance. A kitchen is a breeding place for germs and mess, and even though you may not run a restaurant, a staff kitchen still needs to be cleaned – which is why kitchen & extraction system cleaning is so important.

Using our high quality machines & bespoke chemicals gives us the best kick start to make sure your kitchen is left gleaming! By the time we finish, we will have used our high powered commercial steamers to decarbonise your cooking equipment and your floors will look sparkling after they have been buffed and machine dried!

Your insurance company will require your kitchen extraction system to be cleaned to a TR-19 standard to be valid in case of a fire! At UK Commercial Group we have fully trained BESA Grease Hygiene Technicians to do these cleans. The specially trained operatives understand the standard and clean ALL of your Extraction system to less than 50 microns or grease as well as produce a professional report with before and after pictures in it so you can understand exactly which parts of your system may be a fire risk. Our kitchen & extraction system cleaning services are one of the most popular services that we provide and with our training in mind you know that the job will be done right the first time.

Commercial Damp Proofing

Commercial Damp proofing refers to the preventive measures taken to ensure damp problems do not occur in your property. Your property could be the victim of damp problems.

So whether you are worried about penetrating damp or rising damp in your business premises, UK Commercial Group can help. Our fully trained technicians can identify the type of damp affecting your property and design an appropriate damp proofing treatment to eliminate the problem from root.

National & Nationwide Maintenance Services

Commercial Facilities Management

UK Commercial Group provides a wide range of commercial facilities management services to premises of all sizes across the UK. We aim to take the stress out of maintaining your premises and act as your single point of contact for all your facility management requirements.

As your facilities management partner, we will handle all the support services for your premises to ensure your building is clean and well maintained at all times. Be it daily cleaning or fixing minor repairs, we can handle them all on your behalf so you can focus on the core functions of your business peacefully and effectively.

Fire and Flood Restoration Services

Fire and flood are two of the most devastating natural disasters that can occur. After a building has been attacked either by a flood or a fire, the imminent priority is to get the property back to its former state at the earliest. With floods this means getting the water out of the building and drying it out ASAP!

Over years of doing this type of restoration we know that getting in fast is of paramount importance so all of our flood restoration teams carry various types of pump to remove water fast from any situation! Once the bulk of water is removed Dehumidifiers and blowers are set up to dry out the property then the affected area is sanitised to make sure no harmful bacteria or spores are present.

In fire restoration it is vitally important to clean down surfaces in the correct way, we have specialist chemicals to make sure this is done. Once cleaned we will then fog the area with another chemical to encapsulate any remaining smoke odour without this process the smoke smell will never leave a property! With these methods UK Commercial Group aim to get your property to its former glory while keeping secondary damage under control and ensuring minimal disruption.

Garden Maintenance

When a customer arrives at your office grounds, what is the first thing that they see, it is not your smiling, welcoming face. No, it is your garden, car park and courtyard areas – which is why garden maintenance is so important!

Often businesses think first about the inside of their premises, making sure that they are looking perfect. But many forget that outside is just as important.

Our gardening services can be tailored to what you need but include the following as well as more if it is required, Grass cutting, Hedge Trimming, Edging, Planting flower beds & providing hanging baskets, litter picking and leaf removal as well as weed treatments to make sure your car park is kept to the best looking standard! We find that these packages are different for all of our customers as well as changeable depending on season so get in touch with us to discuss what would be best for you!

Gutter Replacement and Repairs

The gutter is an important part of your business premises or home. It keeps water from entering into your property. A damaged gutter can cause unspeakable damage to your property. That's why it's so important for your household/business to keep your gutters in working condition. UK Commercial Group provides cost effective gutter replacement and repairs. Our guttering technicians are fully trained, highly qualified and have years of experience.

Pest Control

Whatever your business is, a pest infestation could ruin your work environment and pose a severe hazard to your business and your customers. This is why it is important that as soon as you notice the signs that you have a problem, you need to get professionals out to fix your pest control problem.
